UPDATED! Cloud AMS File Explorer

The new and improved Cloud AMS File Explorer allows you to quickly move files from the local drive on your computer to your Cloud AMS folders on our server!

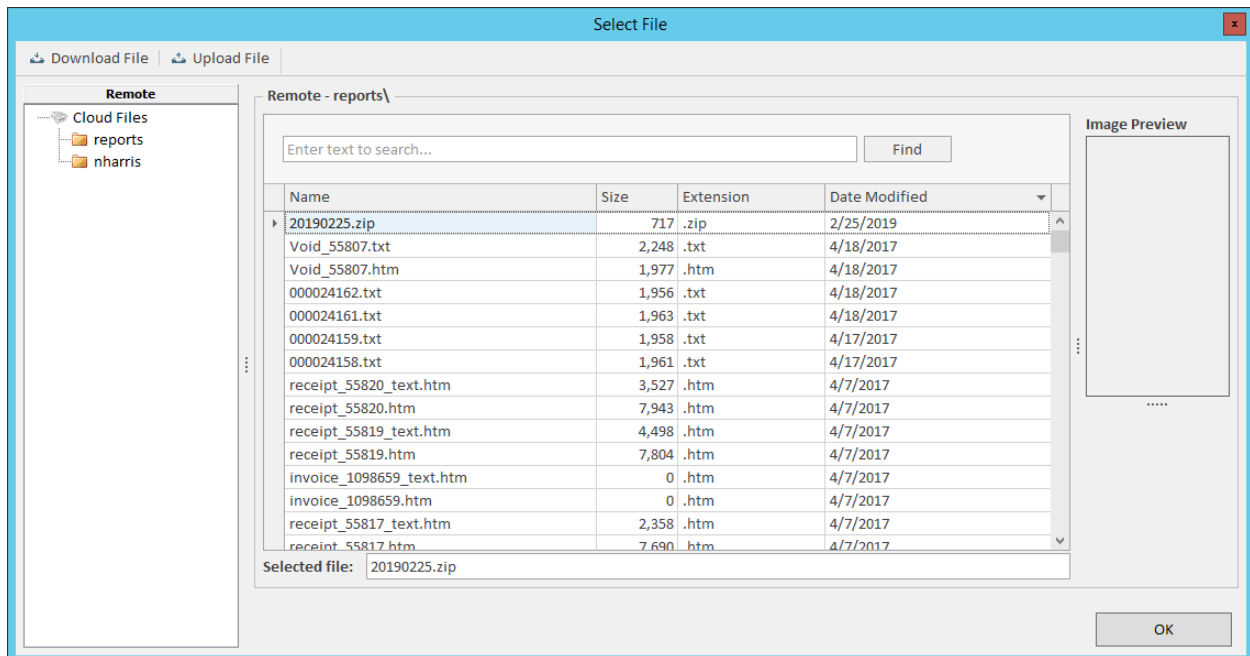

You now have the ability to save files in Cloud AMS from a local drive on your computer. Use the “Upload File” button to grab local files and designate a spot for them on the Cloud AMS server.

Easily access the newly saved files for use in Cloud AMS, such as member documents and photos, as well as many utilities in the system that require a saved file for comparison/import.

You can also download files back to your local drive in case you need a locally saved copy.
