

What's New in Cloud AMS 2.9.01

Rapattoni *Magic*-Cloud AMS 2.9.01 is coming soon! This exciting new version will give your association access to the enhancements listed below.

New Member Portal Updates!

- **Custom Alert Text for “Display Only” Classes & Events** – Take full control of your class and event messaging! When a Class or Event is set to “Display Only,” you now have the flexibility to remove or customize the default alert message. Instead of the standard text (*“Online registration for this class is not allowed. Please contact your association or MLS office for assistance.”*), you can tailor the message to better suit your organization’s needs.

To remove or update the “Display Only” Classes/Events alert text, please contact Rapattoni Support.

New *Magic*-Cloud AMS Updates!

- **Improved M1 Integration** – M1 integration is now faster, smarter, and more reliable than ever! Offering enhanced stability and performance, the updated M1 interface helps associations seamlessly communicate member and office information to NAR.
- **Supra API Integration** – We’ve launched a brand-new interface for Supra, replacing the legacy data exchange process with a more modern and efficient API solution. This upgrade streamlines Supra data synchronization and improves reliability.

Note that the new Supra interface is not enabled by default. To activate it, please contact Rapattoni Sales at 800-722-7338.

- **Extended Character Limits for Name & Nickname Fields** – Name fields have been updated with extended character limits to allow for more data. The **First Name** and **Nickname** fields can now accommodate up to 30 characters, while the **Full Name** field can now accommodate up to 64 characters.

- **New Zero-Cost Requirement for Conventions** – With this update, authorized users can now set up conventions with no registration fees, making it easier to host free events and boost participation.
- **Increased Receipt & Invoice Digit Limit** – Receipt and invoice numbers generated from *Magic-Cloud AMS* now include up to 10 digits, allowing for greater flexibility and scalability in your financial records.
- **New .CSV Export Options** – *Magic-Cloud AMS* users can now export a variety of additional reports in the .CSV file format, offering simplicity, speed, and compatibility for data exchange across platforms and software.

For instance, you can export your cash receipts and sales journal reports in the new .CSV format to work with the data in Excel and other applications.

[**Click here to watch a quick tutorial video!**](#)

See below for a list of reports and journals that are now available in the .CSV format.
