

Announcing...

Rapattoni *Magic* Version 9.28.10 (NOW AVAILABLE)

Rapattoni Corporation is proud to announce Rapattoni *Magic* version 9.28.10. Following are highlights of this release. See the attached Release Notes for a complete list of changes.

- **Magic Print Screen Button**
In addition to being able to print to a network or USB printer, you can now print to a locally attached USB printer.
- **Sign-in Sheets**
We have added the ability to choose between several different IDs and to optionally include email addresses on all Sign-in Sheets. You can choose between license number, member number, MLS ID or NRDS ID for the committee, event, education, and convention sign-in sheets. Including email addresses on the sign-in sheet allows your members to quickly verify that you have the most current email addresses for them.
- **Email Icons**
For your convenience, we have added the ability to email the responsible member or the office manager by clicking on the new email icons directly from the office query screen. You will no longer have to zoom to multiple screens to do this task.
- **Quick Search Buttons**
The quick search buttons which were added in version 9.27, enabling users to open a new window without closing the window they were already working on, have been an immensely popular feature. However, many users were losing track of the total number of windows open and creating resource and locking issues as a result. We have modified the forms that come up when you click on the icons so that they identify which copy of the form is open. In addition, the total number of windows has been limited to three to avoid resource issues.
- **Other Transmittals**
You can now select the data for your transmittals based on Bill Type rather than Member Type.

Our focus is on delivering the best association management software on the market. We value our customers, and sincerely hope you and your staff enjoy all the new features of Rapattoni *Magic* 9.28.10.

Rapattoni Magic Release Notes - v9.28.10

Report run on 05/03/10 at 14:05

From Version: 9.28.09 Thru Version: 9.28.10

Type	Name	Description
Programs - IMS		
Internet Member Services		
	IMS Class Registration	The Class ID field has been modified to allow numbers and uppercase letters rather than lowercase letters. There was an issue with direct links to classes where, if the user typed the Class ID in the direct link in lowercase, it would be inserted into the table lowercase. This caused problems on sign-in sheets and other reports because the reports used this field to page break.
	IMS Convention Registration	The Convention ID in the link for the Event Registration Cart table field has been modified to allow numbers and uppercase letters rather than lowercase letters. Also added the UPPER function to the output of the Convention ID in the merge so the page would display the Convention ID in all caps. There was an issue with direct links to classes where, if the user typed the Event ID in the direct link in lowercase, it would be inserted into the table lowercase. This caused problems on sign-in sheets and other reports because the reports used this field to page break.
	IMS Credit Card Info	Added Shipping information fields to the form from the e-checkout.
	IMS Event Registration	The Event ID field has been modified to allow numbers and uppercase letters rather than lowercase letters. There was an issue with direct links to classes where, if the user typed the Event ID in the direct link in lowercase, it would be inserted into the table lowercase. This caused problems on sign-in sheets and other reports because the reports used this field to page break.
Programs - Membership		
Accounting		
	Invoice Detail Lookup	Limit the number of Quick Search windows for Member/Office/Query that can be opened at the same time. Also modified to display the occurrence of the window in the title (i.e., "Quick Search #2").
	Pay One Invoice	We have modified the program so that if you select a credit card payment type then you cannot change the Amount Tendered. This change was made so that you cannot partially pay an event, class, or convention registration.
	Receipt History Form	The Issue Credit button will now be enabled when the current date is greater than or equal to the last day of the month.
	Receipt Query & Adjustments	The Issue Credit button will now be enabled when the current date is greater than or equal to the last day of the month.
	Suspend/Terminate Members	Field Level Change will now be recorded when a member is suspended or terminated using this program.
	Suspend/Terminate Offices	A warning message has been added that reads: "Please make sure that you have run the Suspend/Terminate Members utility prior to using this utility. If you need assistance with running the Suspend/Terminate Members utility please contact Rapattoni support."
	Suspend/Terminate Offices	Field Level Change will now be recorded when an office is suspended or terminated using this program.
Committee		
	Committee Sign-In Sheet	The ability to print email addresses has been added to the Sign-In Sheet. In addition, you can choose between several different IDs you would like to print: License Number, Member Number, MLS ID, or NRDS ID.
	Purge Committee Members	We can now track who is running this program. Some customers have reported that this program has been run several times over the years and there was no record of who was doing this task.
Convention		
	Convention Sign-In Sheet	The ability to print email addresses has been added to the Sign-In Sheet. In addition, you can choose between several different IDs you would like to print: License Number, Member Number, MLS ID, or NRDS ID.
Education		
	Class Sign-In Sheet	The ability to print email addresses has been added to the Sign-In Sheet. In addition, you can choose between several different IDs you would like to print: License Number, Member Number, MLS ID, or NRDS ID.
Event		
	Event Sign-In Sheet	The ability to print email addresses has been added to the Sign-In Sheet. In addition, you can choose between several different IDs you would like to print: License Number, Member Number, MLS ID, or NRDS ID.
Membership		
	Magic Print Screen Button	In addition to printing to your network printers, the Magic Print Screen button has been modified to allow you to print to local USB printers.

Rapattoni Magic Release Notes - v9.28.10

Report run on 05/03/10 at 14:05

From Version: 9.28.09 Thru Version: 9.28.10

Page 2

Type	Name	Description
Programs - Membership		
Membership		
Member Information Form		Modified the way the member photo is displayed. The program looks to see if the customer uses IMS. If so, the users must select a photo from the agentpics folder. If the customer does not use IMS, it will default to the photos folder. The customer will need to copy any photos they want to attach to the member in one of the two folders listed above depending on if they use IMS or not. If users select a photo from a different folder it will put the full path in the file name and will not show up correctly.
Member Information Form		If a user was running a workstation with the new Windows 7 operating system and Windows Server 2008 and using Large Fonts, some fields were overlapping or being cut off. In addition, the font for additional phones was incorrect and causing it to overwrite other fields. This has been corrected.
Member Information Form		If the Preferred Mailing Address was home, then the city was being pulled from the ZIP Code table instead of the Member table. This was a problem if a different city name was entered in the Home Address instead of what's in the ZIP Code table. This has been corrected.
Member Query Form		We have made a change to the way the database tables link which will increase the speed on incremental queries on the first name field.
Member Query Form		Limit the number of Quick Search windows that can be opened at the same time. The number of open windows will display and an error message will come up if you try to open more than three Quick Search windows at the same time.
Office Query Form		Added email icons on the screen for Responsible Member and Office Manager.
Office Query Form		Limit the number of Quick Search windows that can be opened at the same time. The number of open windows will display and an error message will come up if you try to open more than three Quick Search windows at the same time.
Other Transmittals		
Full Export - Online		You are now able to select based on Bill Types (rather than Member Type) when selecting data for your export.
