## Upcoming Listing Picture URL Changes for Rapattoni MLS

Dear RETS Key Contact:

This email is to notify you that Rapattoni MLS is preparing an update that will change the URLs for listing pictures on our MLS sites in October 2018. If your service utilizes picture URLs from Rapattoni MLS sites, you will need to pull updated data once this change has been implemented.

We will begin rolling out this change in approximately two weeks with a soft cutover period, during which the new URLs will be operational and available for RETS pulls, while the old URLs continue to be supported as well. This soft cutover period will last for approximately two weeks. After the soft cutover period, the old picture URLs will no longer be supported, so all services will need to use the new URLs at that point.

Note that the new picture URLs will be constructed with a more granular naming scheme, so it will no longer be possible to predict or derive URLs based on MLNumber.

No action is required on your part at this time. You will receive another email with additional information when the new picture URLs are made available for RETS pulls and exports at the beginning of the two-week soft cutover period.

Please be aware that all other pertinent information, including listing numbers, will not be changing. This update only applies to listing picture URLs.

Sincerely,

Brian Tepfer  
Executive Vice President and Chief Technology Officer  
Rapattoni Corporation
